What is new in version 2.11.1:

- More languages for the Installer and the System Status window

What is new in version 2.11.0:

- More languages for

the user interface • New "Files Restore": make sure the restored items are exactly the same as the backup originals • New "Intimate" mode for network backups • In the "Create" mode of system backups, you can now exclude certain folders (from C:\ to /) when creating a backup. • System backup: you can choose to save only new files/folders (in the "New" mode) or to save files/folders and attributes (in the "Full" mode) • Restore: files are backed up "as is" and restored with their original attributes, which makes restoring large files possible • Unsupported file type handlers can be disabled (check the corresponding menu bar) • Automatic move of files with same name to a new directory after restore (to avoid name conflicts,

especially when restoring from "Local backups") • "The original backup file, which can be anywhere on your computer" (when restoring from "Local backups") • Restore: you can copy the backup file to another location (in the "Restore" mode) • You can now put some backup files (such as all previous backups) in a separate "Backup report" • In "Storage devices" in the "Create" mode, you can now choose to replace existing content of the storage device, and ask for confirmation before proceeding • Backups can now be displayed directly in the "System Status" window • "All saved templates" can now be displayed directly in the "Create" mode of system backup • The backup schedule can be turned on or off

using a checkbox • Backup can now be dismissed directly • New "Archive list" under "Files" in "

What's New In Ashampoo Backup?

Backup your personal or work data automatically Managing data automatically has never been so easy with Ashampoo Backup. By using the program's individual Backup Wizard, you will be able to choose exactly how often you want your data backed up and whether you'd like the backup app to automatically prioritize the contents of your computer. Get restored easily if something goes wrong Restoring your data in the event that something goes wrong with your backup files is now a quick and simple process. Thanks to the

program's cloud-based (SMB) technology, your backed up data will be instantly accessible from any computer. Integrated mobile backup solution Another key feature of Ashampoo Backup is the integration of mobile devices. Simply by connecting your mobile devices to the remote server, you can have one-click cloud access to your files and their backup copies. Desktop-class backup solution Ashampoo Backup is a desktop-class backup solution that gives you the highest level of flexibility and control. It lets you enjoy ease of use and use your backup files seamlessly between computers and mobile devices. Start your free trial today!
